

NAPA JUNCTION ELEMENTARY SCHOOL ENVIRONMENTAL IMPACT REPORT

Project Date:
2018

Key Project Elements/Issues:

- Air Quality
- Greenhouse Gas Emissions
- Health Risk Assessment

Lead Agency:

Napa Valley Unified School
District
2425 Jefferson Street
Napa, CA 94558

Client Reference:

Doug Herring and Associates
1331 Linda Vista Drive
El Cerrito, CA 94530
(510) 237-2233
doug@douglasherring.us

The proposed project is an approximately 47,000 square foot elementary school in American Canyon, California for approximately 650 students. The elementary school would be located along Eucalyptus Drive and replaces an existing elementary school of 435 students. Existing sensitive receptors are located within the residential neighborhoods located to the south of the proposed project. An air quality, greenhouse gas, and health risk assessment related to the construction of the proposed project was completed. The analyses were prepared pursuant to the BAAQMD's CEQA Air Quality Guidelines for assessing the significance of air quality impacts. The greenhouse gas analysis accounted for a solar panel farm and EV charging stations.
